

# GravityZone Compliance Manager

## From Complexity to Clarity: Compliance Made Simple.

Regulatory demands have evolved—from checking boxes to proving continuous compliance, protecting sensitive data, and managing cyber risk. Frameworks like ISO 27001, GDPR, HIPAA, and NIS 2 now require deeper visibility, stronger governance, and tighter security controls.

At the same time, the threat landscape is growing more sophisticated. Many organizations lack a unified view of risk and rely on disconnected tools, making compliance time-consuming and error-prone.

To stay ahead, organizations must move beyond reactive security measures and adopt an integrated, risk-based approach to compliance. They need a smarter way to manage risk, reduce manual effort, and stay audit ready.

**GravityZone Compliance Manager** helps address many of these challenges providing businesses with immediate visibility into their endpoint compliance posture. Designed to simplify compliance and streamline audit readiness, it brings together security, risk, and compliance in one platform.

## Key Capabilities:

- ↳ **Supports Multiple Compliance Standards** – GravityZone Compliance Manager streamlines regulatory alignment by offering out-of-the-box support for major compliance frameworks, including GDPR, PCI DSS, NIS 2 Directive, CISv8, SOC 2, CMMC 2.0, HIPAA, ISO 27001 and more\*, to help organizations meet complex regulatory requirements.
- ↳ **Granular Risk and Asset Insights** – Select specific compliance standards or benchmarks directly from the Compliance Page to view detailed information about associated risks and assets.
- ↳ **Enhanced Asset Visibility** – Drill down into affected assets through the dedicated Risk Management section, where you can access a complete list of findings tied to each asset.
- ↳ **Close Identified Compliance Gaps** – Quickly fix detected compliance gaps with the click of a button – reducing risk, saving time, and streamlining remediation.
- ↳ **Automated, Audit-Ready Reports** – Easily generate detailed PDF or XLSX reports from the Compliance Page. Reports include all dashboard data and modifications, providing a complete overview of compliance status.

## At-a-Glance

**GravityZone Compliance Manager** helps you monitor your security posture against compliance standards, simplifying audit preparation and accelerating compliance reporting. Beyond compliance, it functions as a strategic tool to mitigate cyber risks, empowering organizations to confidently maintain regulatory standards while saving time and reducing operational complexity.

The solution offers comprehensive compliance coverage across endpoints for both cloud and on-premises IT environments, supporting hyper-localized standards to streamline compliance management for diverse user needs. By minimizing resource demands and reducing reliance on specialized expertise, GravityZone Compliance helps unify security, risk, and compliance management. This enables organizations to effectively mitigate risks, optimize resources, and strengthen cyber resilience.

## Key Benefits

- ↳ **Unified Platform** – Unifying prevention, detection, response, and compliance into a single, intuitive platform eliminates the need for multiple security tools. By seamlessly integrating security and compliance management, organizations can streamline operations, reduce complexity, and strengthen their overall cybersecurity posture with greater efficiency.
- ↳ **Simplified Compliance** – GravityZone Compliance Manager minimizes the need for extensive resources and expertise, enabling organizations to effortlessly monitor their compliance status and reduce time spent on compliance.
- ↳ **Comprehensive Coverage** – Supports cloud and on-premises environments across Windows, Linux, AWS, Azure, and GCP adapting to diverse user needs and regulatory requirements for tailored compliance and security.
- ↳ **Automated, Audit-Ready Reports** – Automated compliance monitoring and real-time insights simplify evidence collection, ensuring preparedness for a compliance audit and proactive regulatory adherence—so organizations can stay compliant with confidence and ease.
